

STL closures have been designed with the environment in mind and are 100% recyclable. It is reusable, recyclable and has a low carbon footprint.

REUSE

STL is reusable and we encourage consumers to save the closure and reuse it to reseal similar unfinished bottles.

REDUCE

STL has been manufactured with minimal green house gases and is less than screw cap.

RECYCLE

STL is made from low density polyethylene, one of the most commonly used plastic in food and beverage packaging.

Coded with international material identification code (4), STL can be placed out with other recycling items for regular council collection.

STL is 100% recyclable. It can be discarded with other plastics and can be recycled to make plastic lumbar, commonly used in the community, for park benches, outdoor furniture, public bollards and retaining walls.
